

Shane Homes YMCA at Rocky Ridge

Scope: Dasher Boards – System 250C
Safety Netting – Knotless Nylon

Location: Calgary, AB
Year Installed: 2016

At approximately 284,000 square feet, the Shane Homes YMCA at Rocky Ridge is the second largest YMCA in the world. With world-class building design the expectations for the project were high, and the **Omni Sport System 250C** does not disappoint!

The full-surround seamless glass shielding and backside sheathing combine to create a smooth and clean appearance which complements the flowing wooden structures above. Sledge hockey modifications are the perfect addition to ensure that users of all abilities are able to enjoy this magnificent facility.

The general contractor on the project, PCL Construction Management Inc., noted that “Omni was very professional in their conduct on the project and demonstrated a willingness

to work with the team and respond to the needs of the project. Omni’s preparedness to do what it takes was a definite factor in the successful achievement of the milestone turnovers for the project.”

They also noted that, “Omni was efficient, flexible, and performed quality work. We look forward to working with Omni again on future projects.”

It was our pleasure to be a part of this project, and we look forward to seeing this dasher system serve the people of Calgary and beyond for many years to come!
